

HC6D2 miniBOOSTER

HC6D2 versions: 9 different intensification factors

 P_{IN} : 20 – 207 bar (inlet pressure)

P_H: 800 bar maximum (outlet pressure)

 $\mathbf{P}_{\text{return}}$: As low as possible (return pressure to tank)

 $\begin{array}{l} \textbf{P}_{\text{outlet}} \text{: } P_{\text{\tiny H}} = (P_{\text{\tiny IN}} - P_{\text{\tiny Return}}) \text{ i (intensification)} \\ \text{The intensification ratio is related to the inlet pressure at media 2,} \end{array}$ the values in the table are measured at 1 bar on media 2

Drain connections: Max. 10 bar

Mounting: Inline tube

A model = no dump valve

Description

The HC6D2 is a dual media unit which is capable of delivering up to 41 l/ min flow on the high- pressure end. Like other miniBOOSTER models, the HC6D2 raises supplied pressure to a higher outlet pressure and automatically compensates for consumption of oil to maintain the high pressure.

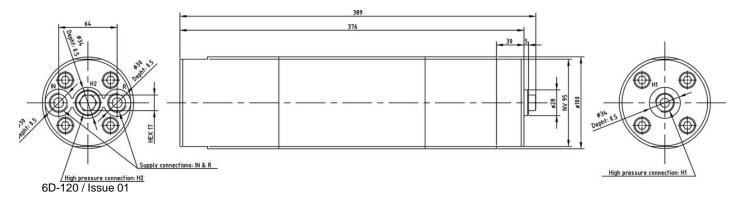

Adjustment of the outlet pressure is carried out by varying the supplied pressure. Relative to its flow capability, the HC6D2 is a compact unit weighing 24 kg.

Flow rates

| Intensification factor i | Max. outlet flow I/ min | Max. inlet flow I/ min |
|-----------------------------|----------------------------|---------------------------|
| 1.0 | 41.0 | 70.0 |
| 1.2 | 38.2 | 70.0 |
| 1.5 | 34.0 | 70.0 |
| 2.0 | 29.7 | 70.0 |
| 3.0 | 22.5 | 70.0 |
| 3.9 | 17.5 | 70.0 |
| 5.2 | 14.5 | 70.0 |
| 7.1 | 8.5 | 70.0 |
| 10.1 | 6.0 | 70.0 |

Dimensions

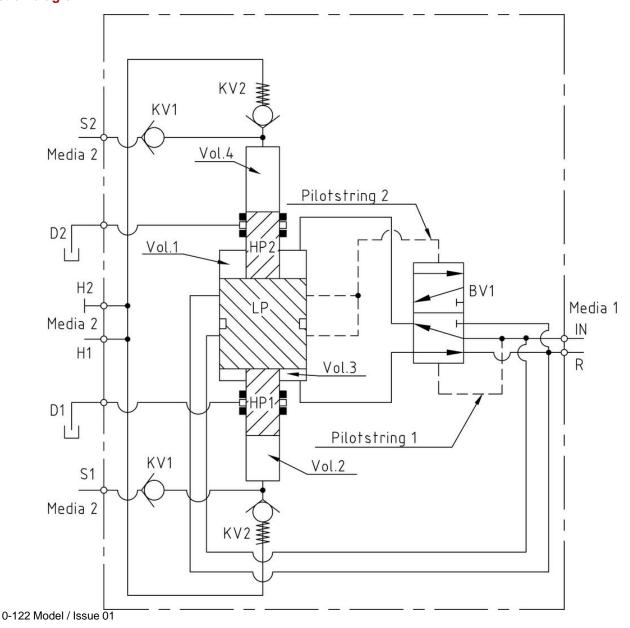

Functions

The basic operation is illustrated in the function diagram. Media 1 is fed through the IN port flowing freely through the bistable valve BV1 driving the LP pistons. From the suction inlet IN Media 2 is drawn through the check valves 2 x KV1, and pumped through the 2 x KV2 to the high-pressure side H. In this condition maximum flow through the booster is achieved giving a fast-forward function.

The unit will automatically stall when end pressure on the high- pressure side H is reached. If a pressure drop on the high- pressure side exists due to consumption or leakage, the HP1 and HP2 units will automatically operate to maintain the end pressure.

Function diagram

Connection types

| Connection | IN / R | H1, S1, H2 & S2 | D1 &D2 |
|------------|-----------|-----------------|-----------|
| 1 | 1/2" BSPP | 1/2" BSPP | 1/8" BSPP |

Max. tightening torque BSPP

| | IN/R | Н |
|-----------------------|------------|------------|
| | 1/2" BSPP | 1/2" BSPP |
| with steel washer | 13.0 da Nm | 13.0 da Nm |
| with aluminium washer | 7.0 da Nm | - |
| with cutting edge | 13.0 da Nm | 13.0 da Nm |

Fluids

Media 1: Recognized hydraulic fluids, glycol solutions (Min > 5%)

Media 2: Hydraulic fluids, glycol

Please note! For other media, such as methanol, please contact miniBOOSTER

Materials

- Body, cast iron, internal components, steel: External surface, zinc chromate finish
- Dynamic seals, H- pur (other seal systems available)

Ordering an HC6D2

Ordering example of an HC6D2 with i = 3.9, with BSPP connections: HC6D2 - 3.9 - A - 1HH

| Model | Intensification, i | Dump valve | Connections |
|-------|---------------------|--------------------|----------------|
| HC6D2 | your selection | your selection | your selection |
| | see flow rate table | A = (no) / A model | 1 |
